Opening Remarks

Dear Apex Community,

The Apex Police Department is committed to serving our community. As a law enforcement agency, which is nationally accredited through the Commission on Accreditation for Law Enforcement Agencies (CALEA), and through our commitment to the community policing philosophy, the department conducts a survey at least every three years. The purpose of our Community Satisfaction Survey is to seek input about the perceptions of our community as they pertain to crime, traffic, public safety, and police services provided by the Apex Police Department. A survey is a tool that helps us measure what our community believes we are doing well and where improvements are suggested. The input we receive allows us to improve the services we provide to our community and enhance our ability to be “Protectors of the PEAK.”

Methodology

Using the department’s Mission, Vision, and Values as a guide to creating this survey, the Apex Police Department began the 2019 Community Satisfaction Survey on April 1, 2019. The survey was offered to residents, business owners, visitors, and others interested in providing feedback to the Town of Apex. The study was anonymous and made available via the Town of Apex’s website, Apex Police Department’s Social Media publications, and at several community events. Printed copies of the survey were mailed upon request. Residents were also notified of the Community Survey through postings in utility billing notices and various informational cards. This survey was also made available in both English and Spanish. The survey closed on November 1, 2019.

The survey consisted of questions designed to gain feedback regarding community attitudes and opinions of the services provided by the Apex Police Department. Survey questions asked respondents to provide feedback regarding overall agency performance, overall staff competency in the agency, perception of officers’ attitudes and behaviors, community concerns over safety and security, as well as recommendations and suggestions for improvement. We have made a diligent effort to be candid with the reader in preparing this report. Many of the questions presented here contain a section entitled, “Comments of Note.” These “comments” have been entered as the comment was received from the participant. Many of these comments are positive, and some are not. We understand and appreciate the importance of transparency with the members of the community we serve and, as such, have included the information for the reader to interpret and decide.

Community Satisfaction Survey Summary
