From: _____

Company: _____

Phone: _____

Fax: _____

Project Name: _____

Site Location: _____

There is a \$75 fee for the flow test. The check should be made out to the “Town of Apex” and brought to the site at the time the fire flow is conducted.

- The Town of Apex is not able to conduct the fire flow for you; you are responsible for bringing the required testing equipment and an additional person to assist with reading of the test gauges. We are the only ones that can operate the fire hydrants for the Town and have to be on site when the test is conducted.
- Please note that fire flows will only be conducted when the temperature outside is 40 degrees Fahrenheit or above.
