Existing Town ordinances require either the dedication of open space for public recreation or the payment of a fee in lieu per unit. The requirement regarding land dedication or fee in lieu will be based, in large part, on the Town’s adopted Parks, Recreation, Greenways, and Open Space Master Plan. Recommendations regarding the acceptance of land or fee in lieu are made to the Town Council by the Parks, Recreation, and Cultural Resources Advisory Commission. For more information, contact John M. Brown, @ 919-249-3344. 1. Annually on January 1, the fee amount shall be automatically adjusted in accordance with UDO §14.7.1(B).

A = Total Gross Building Floor Area

B = Fee Per Square Foot Based Upon Occupancy

1. Alterations to existing structures, with no footprint increase, are charged at a rate of .60 of the Permit Fee or the minimum per trade fee based upon the Single Trade Fee Schedule, whichever is greater.
2. Permits for “shell” buildings are charged at a rate of .60 of the Permit Fee, based upon a Business Occupancy, or the minimum per trade fee based upon the Single Trade Fee Schedule, whichever is greater. Area within the building shell, which is intended to be occupied, will have the permit fees for the occupied area computed per footnote #1 above.
3. Additional Miscellaneous Fees, listed below, will be added to the permit fees as applicable.

**Conditions:**

1. All irrigation meters will require payment of capital reimbursement fees.
2. NCGS requires a second meter for in-ground irrigation systems and that systems be protected by an approved backflow preventer.
3. A plumbing permit is required for installation of the system from the meter to the backflow preventer.
4. All associated fees will be collected by the Building Inspections & Permitting Department prior to issuance of a permit.
5. All other non-single family customers (subdivision entrances and commercial sites) require a second meter.
6. The Water Resources – Water & Sewer Utility Operations Division will only install the tap for meters for existing single-family customers; all other taps must be installed by a private contractor and inspected by Water Resources Infrastructure Inspections Division.
7. Single family Meter Tap Fee includes installing a split tap at an existing meter. If the split tap is already installed, see “Meter Only” fees under the “Water Taps & Meter Fees.”
**WATER AND SEWER CAPITAL REIMBURSEMENT FEES**

The purpose of Capital Reimbursement Fees are one-time capital charges assessed against new development as a way to provide or cover a proportional share of the costs of capital facilities. These treatment facilities provide the system capacity that each new development will demand when connected to the water and sewer systems. Additional fee assessments shall be required of nonresidential customers who, after paying a Capital Reimbursement Fees fee, expand their service requirements. A 75% grant may be available in the Central Business District.
